

Home screen

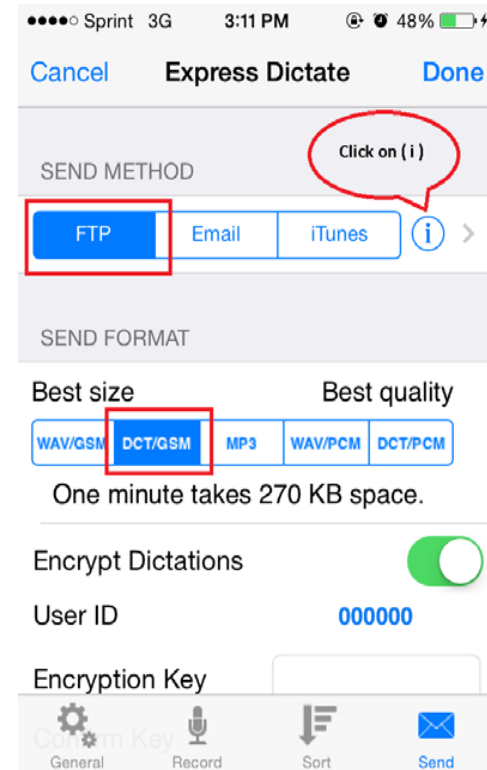

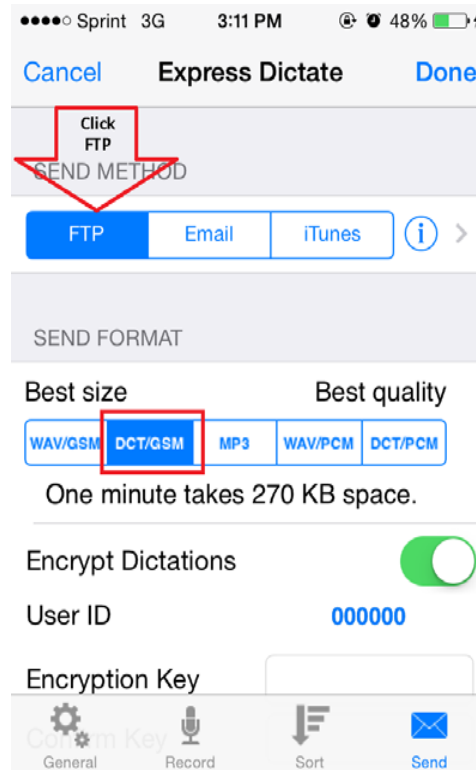

Click on the settings as shown above

- "Pocket Dictate" has been upgraded and the name has changed to "Express Dictate."
- You will not be able to see the old dictations which were done while it was "Pocket Dictate". The only way to get those dictations is to download it to your computer using iTunes.

General Record Sort Send

Make sure you click the "Test FTP Settings" and confirm whether you are able to get connected or not.

Recording and saving a new dictation

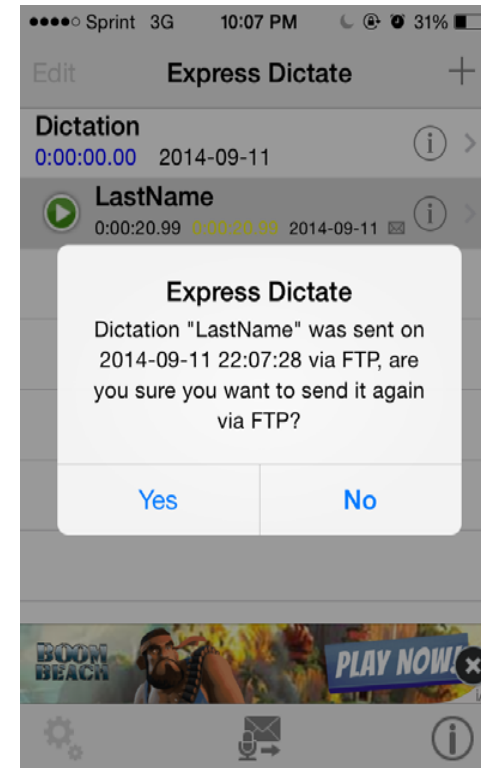

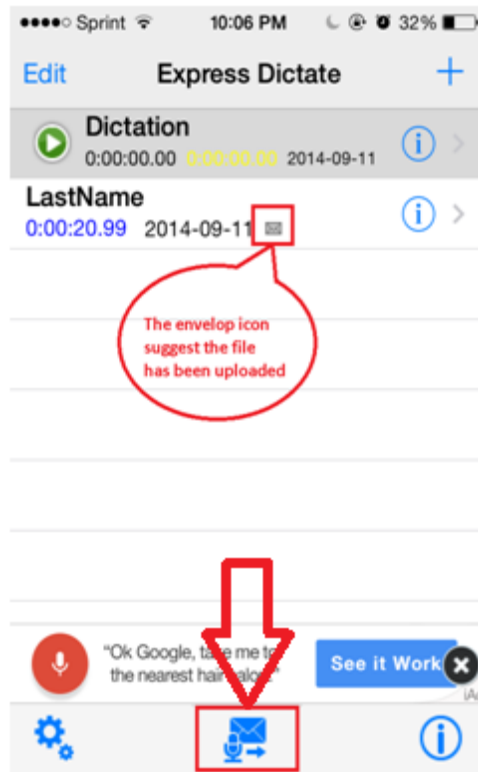

- Press the Record button to start recording and then press the stop button to stop the recording. If you wish to continue with the dictation, press the record button again and then stop when done.
- Once you are done with the dictation you need to click the "List" button to get back to the home screen.

Sending or uploading the dictations

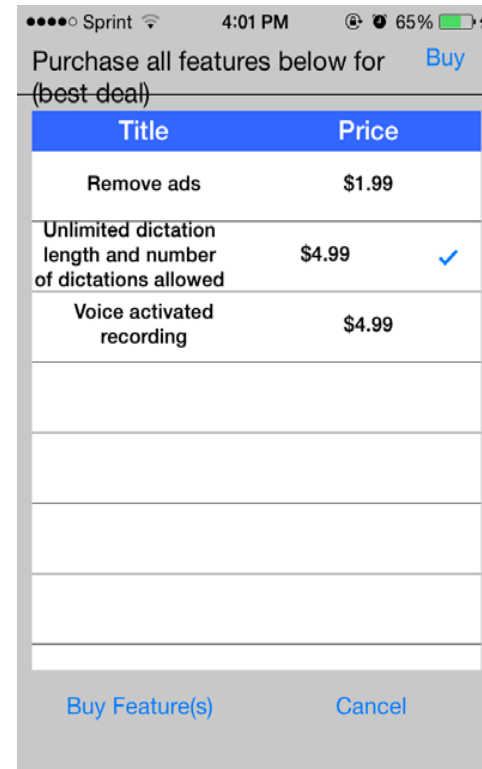

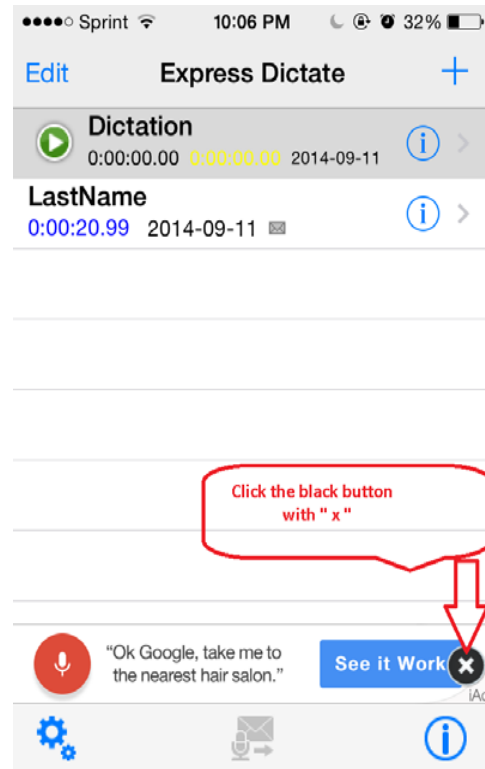

- To send or upload the dictations select the dictation and then click the blue envelope button as in the above picture.
- Once the dictation has been uploaded successfully a grey envelop icon will come up as in third picture from the left .
- **Note: Make sure you have a good internet connection when uploading the dictations. If the internet connection is not good or gets disconnected while uploading, we will receive a corrupted voice file. Always try to upload the dictations when you have a strong WiFi connection. We do not recommend uploading dictations over 3G or 4G connections.**

Resending or re-uploading the dictation

- If you are not sure whether the dictation was uploaded fully or not, you can resend the dictation.
- First select the dictation and then click the blue envelop button. You will be prompted with the message as in the picture on the right.

Purchasing the Express Dictate App.

- Click the black button with "x" to make a purchase of the software and get rid of the advertisements and enable full features.
